

Revenue Flow Diagram: How Revenue Moves Through the Enterprise

1. Operational Source System

POS, PMS, E-Commerce, ticketing. Captures Quantity, Price, Customer, and Timestamp as the basis for billing and revenue events.

2. Billing & Invoicing

ERP Billing, AR, Subscription Billing. Applies pricing rules, discounts, and contract terms to drive Invoice Creation and Receivables.

3. Revenue Recognition

ASC 606/IFS 15 rules. Manages Deferrals, schedules, and allocations using mileage, usage, and subscription logic.

4. ERP General Ledger

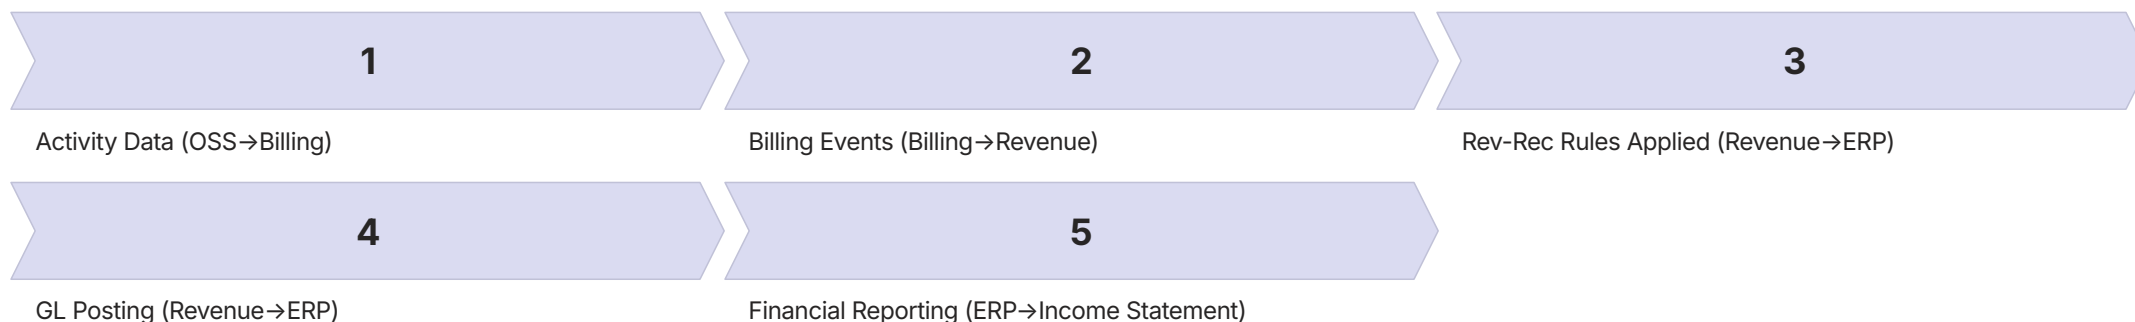

COA mapping, cost centers, BU alignment. Posting validations, period close, and subledger-to-GL reconciliation.

5. Income Statement

Product, service, subscription revenue. Includes Event/F&B and Room Revenue for a consolidated P&L view.

Represents Data Flow

Control + Data Quality Points

- Pricing & Contract Controls
- Revenue Recognition Compliance
- Interface & Posting Validations
- Reconciliation Checkpoints
